Engineering

We are Engineers - script

What is engineering?

Who are engineers?

What does an engineer look like?

Well...

We're creative...

As well as practical.

Engineers are solving global problems.

Innovating.

Entertaining.

Connecting people.

Engineering takes me from one side...

To another.

From one continent...

To another.

Engineering is worldwide...

And beyond.

From technology and software...

To medicine and healthcare,

And the everyday things we take for granted...

Engineering is so much more than you think.

Engineers are creating our future.

I am an engineer.

We are engineers.

< Please look to the camera for 5-10 seconds >

In addition to this film, we are also looking for engineers to feature in our broader online content and we would be very grateful if you could also give brief answers to the four questions below to camera.

If you would be happy to take part in a more in-depth interview, please let us know and we will send you the details right away!

1. What is your name and what type of engineer are you?

2. Why do you call yourself an engineer?

3. How do you use creativity in your job?

4. What problems in the world will engineering solve?
